Humidity

Because Shreveport is in one of the most lively cities in the world, there are a ton of culinary experiences in the Bossier City. To name a few, there's The Louisiana Food Prize, 318 Restaurant Week, and Battle of the Gumbo Gladiators. These events are called The Red River Riches and always include award-winning restaurants, local and small talents, and amazing celebrations that represents the region's culinary culture

The climate of Shreveport is transitional between the subtropical humid-type prevalent in the South and the continental climates of the Great Plains and Midwest to the north. During winter, masses of moderate to severely cold air move periodically through the area. The spring and fall seasons are usually mild, while the summer months are consistently hot and humid, with high pressure and a moist southerly flow being the dominant features. Rainfall is abundant with the normal annual rain of just over 51 inches, with monthly averages ranging less than 3 inches in August to more than 5 inches in May and June. The average growing season for northwest Louisiana ranges between 230 and 240 days in length.

Louisiana

One of the largest farmers' markets in North Louisiana is the Shreveport Farmers' Market and that is the place to be every weekend. Shreveport's Farmers' Market is a ongoing booming environment that hosts festivals, live music, cooking demonstrations, and so much more.

DEMOGRAPHICS

A.3

Project Design Style

One of the main things, not only Shreveport but Louisiana is best known for in general is its festivals, music, rich history (museums), food, and many activities. Shreveport Louisiana is full of family owned and small black businesses.

Because Shreveport is so family oriented and businesses are based on different styles, I'm going to use the restaurant Chianti for my main inspiration. Shreveport is full of many beautiful, different, and historical buildings and based on the styles that I've seen so far, I think I'm going to stick with a similar style/theme for cohesiveness.

DESIGN STYLE
SUMMARY

A.4

Project Statement & Concept

The way I envision this building is to have low light and become a very intimate space for couples or groups of friends to go out, celebrate, and have a good time. Because this restaurant will have a live performance stage So the concept for this restaurant is to create a space that's warm and friendly for the community but with a splash of luxury for the adults to enjoy.

My personal style is really warm I think, I like to work with warm colors like brown, reds, black, and sometimes gold. For this project, I want to use gold to distinguish private spaces and add a nice accent to the bar/entertainment stage
